

# CCS DAYS SOFTWARE EXPO MECHANICS

## I. EVENT OVERVIEW

The Software Expo is a project-based competition where participants showcase software applications, systems, games, websites, mobile applications, or innovative digital solutions they have developed. The event aims to encourage creativity, technical excellence, innovation, and real-world problem solving.

### Objectives

- Promote innovation in software development
- Encourage teamwork, creativity, and problem-solving
- Showcase technical and presentation skills
- Apply programming and design concepts to real-world solutions

### Event Information

- **Event Duration:** One-Day Event
  - **Date:** May 13, 2026
  - **Venue:** CCS Room (Specific Room Number/Location – To Be Announced)
  - **Time:** 10:00 AM – 12:00 PM
  - **Audience:** Students from the College of Computer Studies (CCS), Faculty Members, and Official Judges
- 

## II. PARTICIPANTS

### Team Composition

- Each team shall consist of **3–5 members**.
- Teams may represent their **house, section, strand, or organization**.
- Each team may submit **one software project only**.

### Eligibility

Participants must:

- Be officially registered before the registration deadline.
  - Be currently enrolled students or active members of the organization.
  - Develop an **original software project** created by the team.
- 

### III. PROJECT CATEGORIES

Teams may present projects under any of the following categories:

- Desktop Applications
  - Mobile Applications
  - Web Applications
  - Educational Software
  - Business Systems
  - Games
  - Artificial Intelligence Projects
  - IoT/Embedded Software Solutions
- 

### IV. COMPETITION MECHANICS

#### Phase 1: Registration

Teams must submit the following:

- Team Name
- Names of Members
- Project Title
- Project Category
- Project Description

#### Phase 2: Booth Setup

- Each team will be assigned an exhibit booth or presentation area inside the designated CCS Room.
- Teams must arrive early and complete their setup before the event officially starts.
- Teams must prepare all necessary hardware, software, visual materials, and presentation resources.

#### Technical Equipment

Each team must bring their own:

- Laptop or computer containing the complete project files
- Laptop charger or power adapter
- Extension cord or power strip
- Mouse, keyboard, or other peripherals if needed
- Mobile device or tablet (if required for mobile application testing)
- Backup storage device such as USB flash drive or external drive containing project files and installers

## Software Preparation

Teams must ensure that:

- The software project is fully installed and ready to run before the event
- All required dependencies, frameworks, libraries, and databases are properly configured
- Demo accounts, sample data, or test environments are prepared if needed
- The project has been tested to avoid crashes, bugs, or startup issues during presentation
- An offline version or backup demonstration is available in case of internet connectivity issues

## Presentation Materials

Teams should prepare:

- Project presentation slides (optional but recommended)
- Project poster, tarpaulin, or visual display materials (optional, if booth setup allows)
- Project documentation or system overview
- Flowcharts, diagrams, wireframes, or system architecture visuals (if applicable)
- Team identification materials, if required by organizers

## Team Preparation

All team members must:

- Be familiar with the project's features, functions, and technical implementation
- Know their assigned speaking or demonstration roles
- Arrive at least **30 minutes before the official start of the event** for setup and equipment checking
- Wear proper school attire, organizational uniform, or prescribed dress code

## Backup and Contingency Preparation

Teams are strongly encouraged to prepare:

- Backup copies of project files

- Backup presentation files
- Screenshots or recorded demo videos in case technical issues occur
- Alternative demonstration methods if hardware or software problems arise

### Phase 3: Project Presentation

Each team will be given:

- **10 minutes** for project presentation and live demonstration
- **5 minutes** for judges' questions and evaluation

During the presentation, teams must explain:

- The problem or need being addressed
- Project objectives and target users
- Features and system functionality
- Technologies, programming languages, and tools used
- Development process and challenges encountered
- Future improvements or expansion plans

### Phase 4: Judging

- Official judges will evaluate each project using the approved scoring criteria.
- Scores will be recorded immediately after each presentation.

---

## V. JUDGING CRITERIA

| Criteria                           | Percentage  |
|------------------------------------|-------------|
| Innovation and Creativity          | 25%         |
| Functionality and Performance      | 25%         |
| User Interface and User Experience | 20%         |
| Technical Complexity               | 15%         |
| Presentation and Communication     | 15%         |
| <b>TOTAL</b>                       | <b>100%</b> |

---

## VI. RULES AND REGULATIONS

### General Rules

1. All projects must be the **original work** of the participants.
2. Plagiarism or copying existing projects without proper acknowledgment may result in **disqualification**.
3. Projects must be fully functional during the presentation.
4. Internet dependency should be minimized unless necessary for project operation.
5. Teams must bring their own laptops, chargers, extension cords, and other required equipment.
6. All teams must be present before the official start time. Late arrivals may receive deductions or possible disqualification.
7. Team members must maintain professionalism and proper conduct throughout the event.
8. Audience members must observe proper behavior and avoid disrupting presentations.
9. Judges' decisions are **final and non-negotiable**.

### Prohibited Actions

Participants are not allowed to:

- Sabotage or interfere with another team's setup or project
  - Present offensive, inappropriate, or harmful content
  - Receive outside assistance during judging
  - Modify the project significantly once judging has begun
- 

## VII. AWARDS

### Major Awards

- **Champion** – Trophy + Certificates
- **1st Runner-Up** – Trophy + Certificates
- **2nd Runner-Up** – Trophy + Certificates

### Special Awards

- **Best Innovation Award**
- **Best User Interface Award**
- **Best Technical Implementation Award**
- **Best Presentation Award**

---

## VIII. TIE-BREAKER RULE

In case of a tie:

1. The team with the higher score in **Innovation and Creativity** shall be declared the winner.
  2. If still tied, the higher score in **Functionality and Performance** will be used.
  3. If still tied, judges may conduct a final deliberation.
-
